

EDLD 5363: 8028 Patricia Startz SID:L20052259 – Week 1, story board for Personal PhotoStory Project.

No slide transitions...straight play through. What do you think Shana? At this point, I have not been able to get the music in without narrative getting washed out. I need to record the music track. if I can't get it to work in the video editor. Put all the music in and get it sequenced correctly, mute the narrator play through the video with volume set very low record it on my phone and save as an .mp3. Drop that recording into the media folder, make a copy of the project, delete the music clips, drop in the recording, unmute the narrative and play it to see if it will work that way.

OR... once the music is sequenced, See if I can copy the music bar into track 1 and narrative into track 2 of the audio editor and, if there are separate controls, turn down the music track until it sounds right. Play it and record it, then remove the two tracks from the photostory and drop in the single recorded track. ✓

Narrative Track	Intr.R & tell will introduce kids	Introduce Chris and Victoria	Introduce James and Dad	Introduce Wendy & Billy	Introduce Kim	Introduce Kiana	Tell what Rick does for living	Hectic so we escape
